1998 AP Calculus AB Free-Response Questions

t (seconds)	v(t) (feet per second)
0	0
5	12
10	20
15	30
20	55
25	70
30	78
35	81
40	75
45	60
50	72

- 3. The graph of the velocity v(t), in ft/sec, of a car traveling on a straight road, for $0 \le t \le 50$, is shown above. A table of values for v(t), at 5 second intervals of time t, is shown to the right of the graph.
 - (a) During what intervals of time is the acceleration of the car positive? Give a reason for your answer.
 - (b) Find the average acceleration of the car, in ft/sec^2 , over the interval $0 \le t \le 50$.
 - (c) Find one approximation for the acceleration of the car, in ft/sec^2 , at t=40. Show the computations you used to arrive at your answer.
 - (d) Approximate $\int_0^{50} v(t) dt$ with a Riemann sum, using the midpoints of five subintervals of equal length. Using correct units, explain the meaning of this integral.
